

meet the TEACHER

About Me

Being the current director of the Mequon Center, I also continue to work very part-time as a Surgical Technologist at Aurora Medical Center in Grafton. I have lived in the Grafton area for most of my life. I have three children, one daughter-in-law and one granddaughter. OCC has held a special place in my heart for over 35 years, as my siblings, children and now granddaughter all have their early education rooted here. What makes OCC so special is the longevity we have in our community with over 50 years in business. Not only have we dedicated our mission to provide a consistent high-quality service to the working families in our community, but we also have been a long-lasting employer to a phenomenal group of loving staff.

Educational Experience

I went to Grafton High School and graduated in 1997. I started working at OCCP in 2000 when I completed ECI & EC2. After teaching for a total of 10 years, I went back to school to receive an Associate's Degree in Surgical Technology and starting working at Aurora Hospital in Grafton. After making this change in 2013, I joined the OCC Board of Directors, but was offered an Assistant Director position in 2018 and then promoted to Director in 2020. I completed the Early Childhood Administrator Credential in 2026.

First Day at OCC

October 16, 2018
